

Validation - Choose Callsign

The callsign you entered is: **F5VIP**

EchoLink can be set up with any of several different callsign suffixes. The callsign **F5VIP** (with no suffix) is used in Single-User mode, and the callsigns **F5VIP-L** or **F5VIP-R** are used in Sysop mode. (Sysop mode requires connecting a radio to your computer's sound card using a special interface device.) Each of these three is considered a separate callsign, and must be validated separately for EchoLink.

The following callsign(s) are registered with EchoLink:

| Callsign | Status | Date Registered (UTC) |
|-----------------|-------------------|------------------------------|
| F5VIP | Already validated | 15-May-2003 |
| F5VIP-L | Already validated | 2-Oct-2003 |
| F5VIP-R | Already validated | 23-Oct-2003 |

None of your callsigns are awaiting validation.

If you wish to use one of the calls marked "Already validated" with EchoLink, but you have forgotten the password, you can request a password reminder. Please click [here](#) for details.

FAQ For This Page

I've installed and run the EchoLink software, but I don't see my callsign in the list above. What's the problem?

Check to see if a "firewall" issue is preventing the EchoLink software from contacting our servers. Also, be sure you are **not** using an EchoLink Proxy to connect; you cannot register a new callsign through a Proxy connection (although you may use a Proxy after it has been validated).
